

# FAA Part 107 Commercial Drone Pilot

Steve Haston – Retired Noblesville Fire Department/Hamilton County Emergency Management

I have been a career firefighter and emergency manager for over 34 years. My experience includes Unmanned Aerial Systems (UAS) Program Manager, Operations Chief, and Indiana Task Force One hazmat response specialist. I have been the PIC on over 200 emergency drone missions and have trained dozens of pilots to fly and operate multiple drones and their many advanced sensors and imagery features. Allow me to educate you to operate drones effectively and collect amazing aerial images and video.

## Services - A complete Turn-Key Solution for Operating Drones

### FAA Part 107

Designed to teach student pilots how to operate an unmanned aerial vehicle (UAV), aka drone in the National Airspace NAS, safely and in compliance with FAA regulations.

This course will prepare students for the Part 107 commercial drone testing.

### Advanced UAV Flight

Six-hours of advanced UAV flight maneuver's.PICs are challenged to accomplish scenariobased techniques.

This course also covers, advanced HD sensor use, ground control stations, flight envelope, airspace deconflictions, and in-flight emergencies.

### Thermal Imaging

Our six-hour course is design to master the aerial UAV techniques needed to effectively and efficiently conduct:

- Thermal Imaging
- Interpret Data Sets
- Identify Hot Spots
- Build Reports

### Mapping and Modeling

This six-hour course is designed to teach the PIC how to plot the flight path and execute the 360° mapping and modeling mission.

- Gain rapid 360° data
- Process the 3D model
- Distribute the 3D model

## Mission Statement

Drone Management Group is committed to providing high-quality, real-world Unmanned Aerial Systems education and training to those wanting to incorporate drones into their business or other vertical. We are focused on promoting enhanced safety, operational efficiency, and tactical effectiveness when using UAS to serve their agencies and business through experienced-based knowledge, skills, and abilities.
